

# JULY 24-28

# VISIONWORX – A FILM PRODUCTION

## An Introduction to the World of Film Production

VisionWorx is a fun yet intensive five-day filmmaking camp for children ages 12-17 presented by Azalea Film Festival. The workshop allows young adults to learn more about what it takes to make a movie. We strive to incorporate as much hands-on learning as possible, therefore our focus is on production. Students step into the roles of actors, directors, and crew, and learn the importance of working as a team. In addition, VisionWorx will simulate the real world working environment of indie film making, giving students “real world experience”. The program also reflects the knowledge and skills brought to the table by our participants and our crew.

Our first summer camp will take place July 24- 28, 2017. During the first two days participants will attend pre-production workshops on storyboarding, directing, sound and production design. Then participants will apply what they have learned in the production of the group’s short film. If time allows, students will also have the opportunity to advance into the editing process.

Although many have access to their own video cameras and home computer editing systems, VisionWorx builds on that experience by allowing participants to interact with filmmakers and educators. The program is designed to enhance the knowledge, skills and understanding of all participants, regardless of their level of experience.

Registration is \$195 and includes a copy of the finished film and the official VisionWorx t-shirt. The film that the group shoots will be screened for family and friends at a specially arranged screening. This event takes place in August.
